Behavior Series

Understanding Brain States & Behavior

Participants will be introduced to the applied science of brain states and behavior regulation. The goal of this mini-PD is for staff to begin to understand the underpinnings for all human escalation cycles and how "behavior" is not unique to students with behavioral challenges. Staff will be guided through current research on the topic and could participate in activities that help integrate the content that is presented.

Supporting Students with Behavioral Needs in School Settings

This introductory mini-PD offers participants a brief overview of traditional vs brain-based perspectives on student dysregulation and challenges staff to reflect on their own narratives about student problem behavior. Additionally, a variety of proactive evidence-based practices for mitigating challenging behavior will be presented and participants will have an opportunity to apply strategies to case-studies in a small group activity.

How To "Coach" Students

This mini-PD is focused on practical, hands-on, evidence-based strategies for giving students feedback, offering support, and "correcting" pre-escalation behavior. Staff will reflect on how they like to be "coached" and then apply the scientific information shared to case examples they self-generate. The goal is for participants to walk away with a fresh perspective on how "coaching" vs correcting and/or inadvertent shaming of students could broadly help all the students they serve.

Default vs GROW: How our "Lens" Impacts the Way We Support Students

This mini-PD will start with a brief review of brain states and how behavior escalates in all humans, followed by an outline of the differences between

Santa Barbara County SELPA
Professional Development Events

"default" vs "GROW" lenses. The objective is for participants to understand what influences our perspectives and responses to student behavior and how students, especially students with challenging behavior, deserve scientific coaching practices rooted in dignity not punishment procedures.

Data Collection in Special Education

In this training, participants will have the opportunity to learn about the most common types of data systems used in special education programs (e.g., frequency, duration) and how different IEP goals require different types of data collection. Particular attention will also be given to how to accurately collect ABC data and participants will have opportunities to practice this through case examples and group activities.

Understanding the Functions of Behavior

The focus of this training will be helping participants learn that behaviors are information and serve several different functions. Once functions are understood then skills can be developed that allow students to navigate through struggles in a more adaptive manner.

Fundamentals of Behavior

To help educational staff broaden their understanding of "behaviors" in students, this training will introduce them to the science of behavior, including the neuro-biological cycle of behavior that is true for all human beings. Additionally, information related to ACES, trauma, learning challenges, and chronic stress experiences will be presented to help participants examine their own narratives about behaviors in students.

De-Escalation Strategies: Guiding Principles and Next Steps

In this training, participants will have the opportunity to learn guiding principles for de-escalating students during behavioral/emotional responses and the importance of proactive strategies to mitigate escalation cycles.

SELPA 28: SBCSELPA Continuum of Mental Health Services

Late in 2020, an Ad-Hoc Committee was formed to revise the SBCSSELPA Continuum of Mental Health. This training is to introduce the new Continuum, discuss its function/limitations, and to provide information on

Santa Barbara County SELPA
Professional Development Events

two added services to the Continuum: Social Work Services and Parent Counseling.

Consulting In Classroom Settings

The focus of this training will be on sharing strategies that facilitate collaborative and productive consulting in classroom settings. Specific steps and strategies educational specialists (e.g., BCBAs, MFTs, SLPs) can use to build rapport with team

members and establish mutually beneficial communication. In addition, strategies team members (e.g., teachers, paraprofessionals) can also use when collaborating with consultants will also be shared.

How To Provide Students with Corrective Feedback & Coaching

This training will focus on how team members (e.g., teachers, paraprofessionals, administrators) can give students feedback, both positive and corrective, in a constructive manner that optimizes communication.

SELPA 28A: SBCSELPA Wrap Supports Referral- recorded available on SBCSELPA YouTube Channel

The new Santa Barbara County SELPA Wrap Referral is here—and it's fillable! This short training will explain what Wrap supports are, how the referral process works, and how to document on an IEP. This training will be recorded and available for viewing at your convenience.

Brain-Based Behavioral Perspectives and Support Strategies

Drawing from foundations of interpersonal neurobiology, applied developmental attachment, and specific communication skills; participants will gain a functional understanding of how educators can best support students who present with relational and behavioral challenges. Staff will then be able to calibrate their approach to meet the needs of the student as they exist in the moment, supporting emotional resilience and academic success.

Relational Scaffolding

Santa Barbara County SELPA
Professional Development Events

Drawing from foundations of interpersonal neurobiology, applied developmental attachment, and specific communication skills; participants will gain a functional understanding of how educators can best utilize relationships with their students to support social-emotional development, academic access, and a culture of emotional inclusion.

Self-Care for the Educator

Self-Care for Educators provides a time to reflect on your own mental health so that you can more effectively support students. In the course of our work, we are confronted with the challenging aspects of life. As Educators, we are asked to "do more with less," and work within uncertain funding and restrictive policy contexts. The circumstances the youth of today bring to school often impacts not only our teaching but takes a toll on the school. Practicing self-care is an important activity that will help you cognitively, physically, and emotionally "bounce back" each day over the long term.
